

# TIDAL LINKS

Wholesale Brochure

2024

[www.tidal-links.com](http://www.tidal-links.com)

At Tidal Links, we are an environmentally focussed company based on the west coast of Scotland that provides high quality, sustainable alternatives to your typical golf accessories. Scotland boasts some of the world's best and most famous links golf courses, which share coastlines that are directly affected by the issues of ocean plastic, and we want to do our bit to reduce that waste and clean up our coastlines.

We're the first company to offer golf accessories that are made from recycled ocean plastic. Tidal Links is passionate about golf, raising awareness around the issues with mismanaged plastic waste and the impact to our environment.

For all products, we offer a customised embroidery service, where we can match logos and colours as per specific requirements. Please contact us via the details below for more information on our services and competitive pricing.

Our Partners:

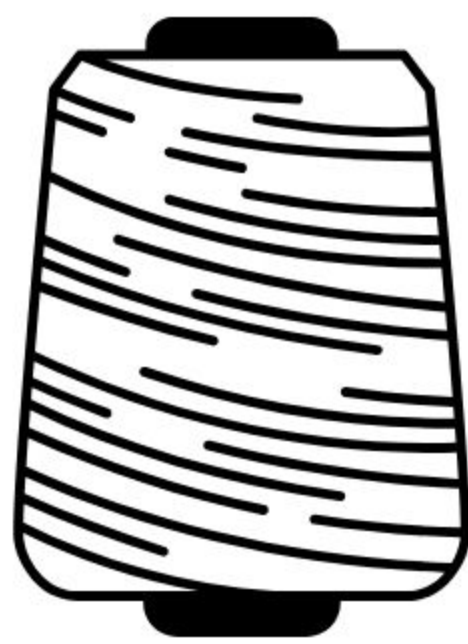

**STEP 1:**

Plastic waste is collected from coastlines by beach clean up organisations, helping to keep beaches clean and safe.

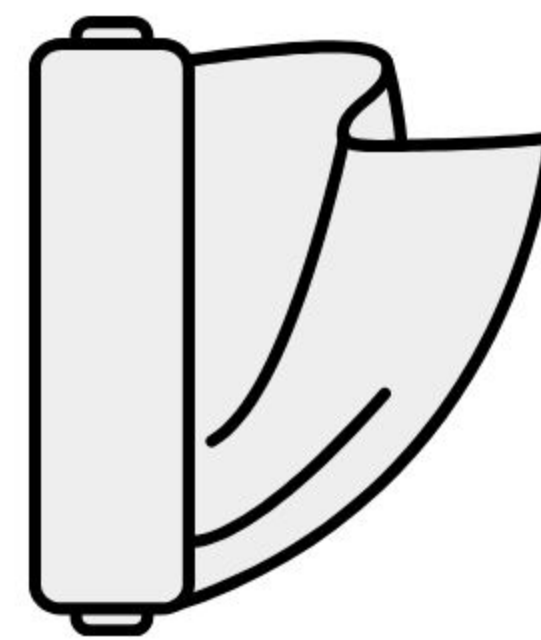

**STEP 2:**

Plastic waste is segregated and cleaned. The polyester parts are taken onto the next process for Tidal Links fabric generation.

**STEP 3:**

The shredded plastic is melted down and extruded into yarn that is used to create recycled fabrics.

**STEP 4:**

The recycled yarn is then woven into fabrics that you'll find in our products.

**STEP 5:**

Our high quality products are handmade right here in Scotland.

# Fabric Range

## Ocean Range Fabrics

Made from 100% recycled ocean bound plastic, developed with Oceanworks.

This fabric range is more structured and carries a canvas like feel.

Ocean bound plastic is abandoned plastic waste that will be transported to the ocean by rain, wind, tides, river flow and floods. This can be located up to 50km from coastlines.

## Sea Range Fabrics

Sea Range fabrics are made from 75% SEAQUAL / 25% recycled post-consumer plastic. SEAQUAL is made from a mixture of recycled plastic recovered from the ocean and post-consumer recycled plastic.

This fabric range is soft to touch and has more of a sock type feel and structure.

Certified to OEKO-TEX Standard 100 and The Global Recycling Standard

## Ocean Canvas Range Fabrics

Sea Range fabrics are made from 50% SEAQUAL / 50% recycled post-consumer plastic. SEAQUAL is made from a mixture of recycled plastic recovered from the ocean and post-consumer recycled plastic.

This fabric range is soft but heavy and structured, carrying a canvas type feel.

Certified to OEKO-TEX Standard 100 and The Global Recycling Standard

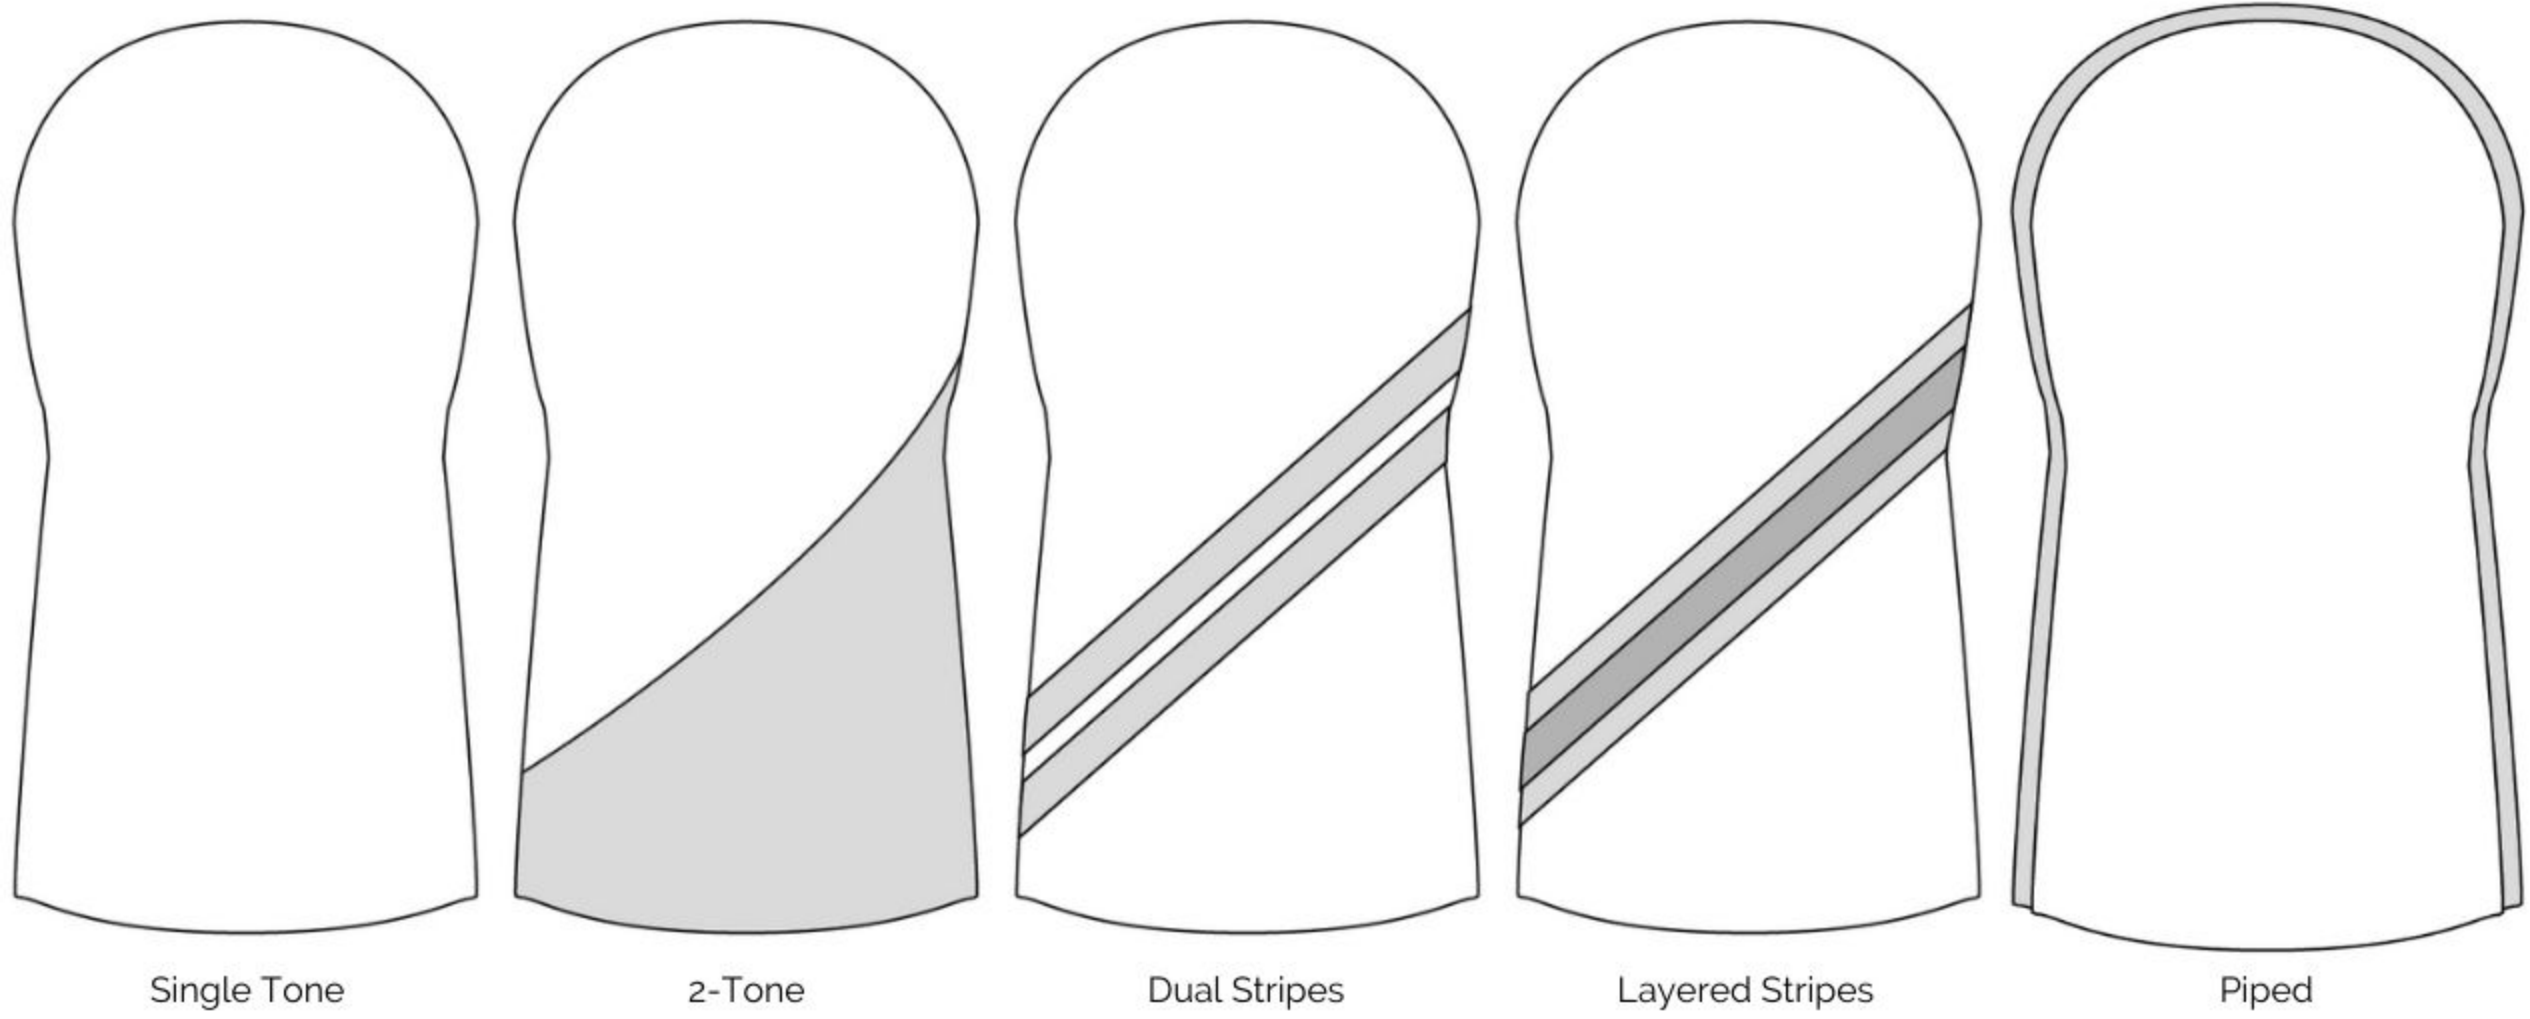

## Fleece Inner Lining

Made from 100% recycled post-consumer recycled polyester.

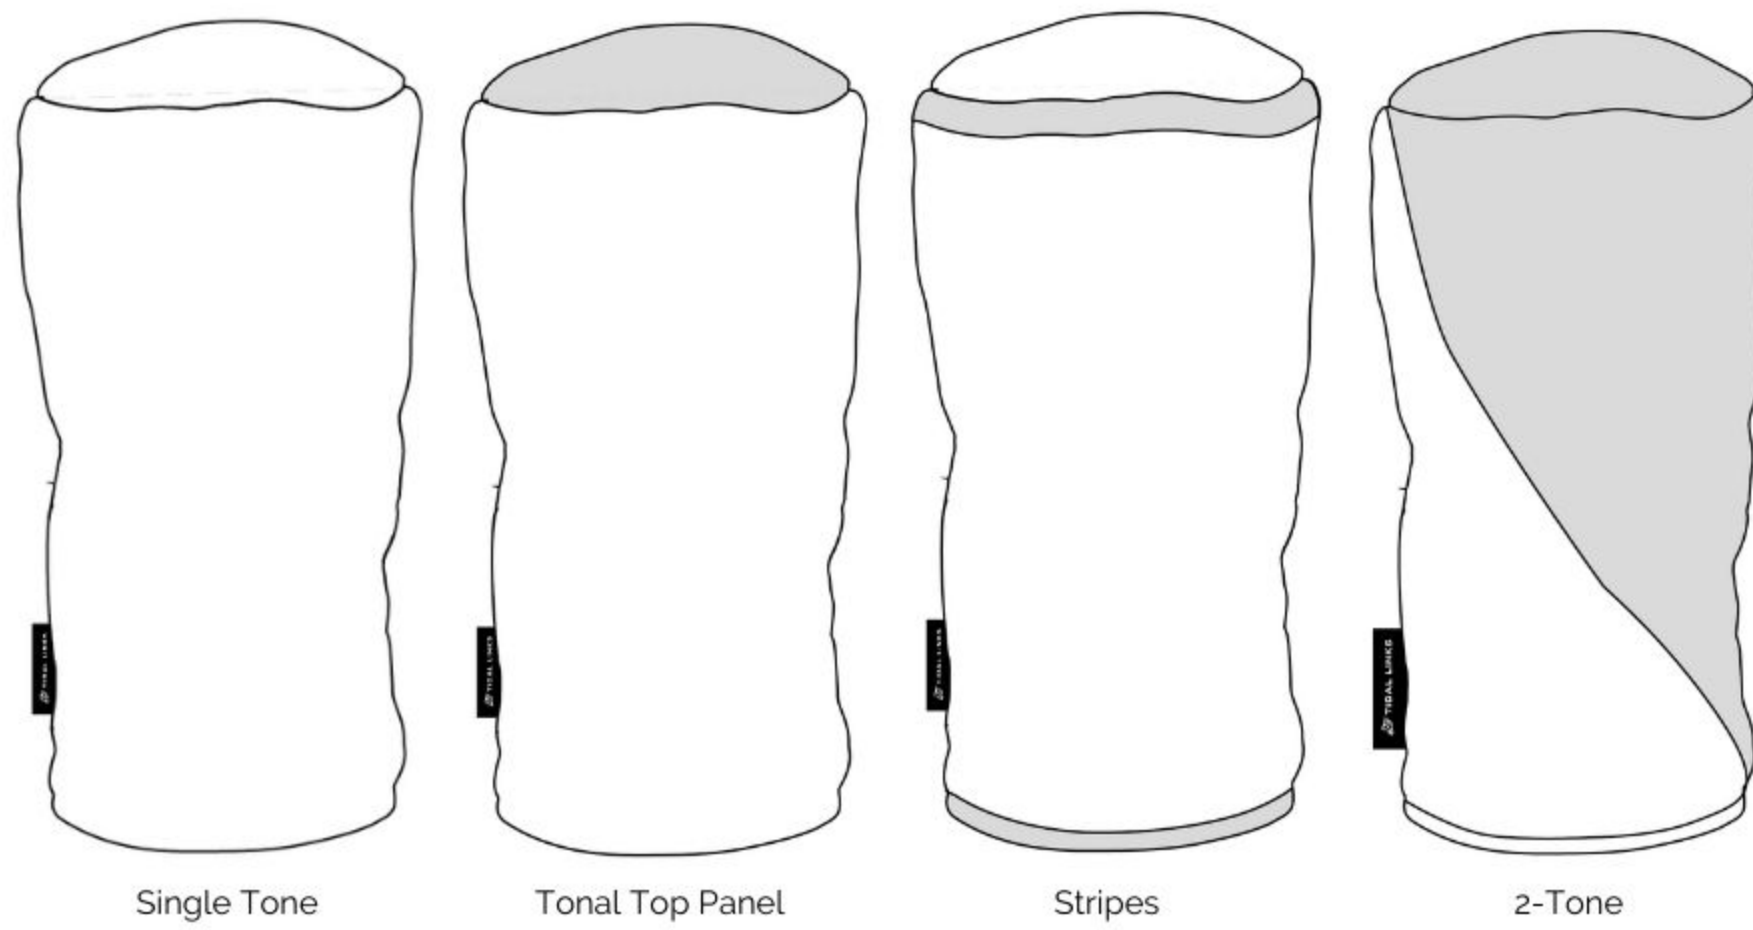

This soft inner lining brings protection to either your golf club heads in our head covers, or your valuables in our accessory pouches.

## Flat Headcovers

# Testimonials

Morton Golf are delighted to have such a wonderful, high-quality product to offer our clients as part of our welcome pack. Sustainability is becoming an increasing focus for our clients and we are committed to maintaining our natural environment for future generations of visitors to our wonderful country. To be able to provide branded items to our clients which are both extremely high quality and made using recycled ocean plastic is truly fantastic.

## **Dave Kerr - Director of Morton Golf Travel**

It has been a great pleasure working with Tidal Links on our new range of sustainable headcovers at Woodhall Spa. There were a wide range of fantastic styles to choose from and custom styles available outside of their standard range. The headcovers were designed and delivered in a timely manner and the quality of the products on arrival were very impressive. We are looking forward to working on future designs going into 2024.

## **Ben Skeet - Retail Manager at Woodhall Spa Golf Club**

Fantastic addition to our pro shop at Turnberry. Offering sustainable alternatives has been well received by our members and visitors. The quality of the products are excellent.

## **Iain McNab - Head Golf Professional at Turnberry Golf Club**

Our Tidal Links selection of products not only appeal to visitors with their quality, but also resonate deeply with the ethos of environmental stewardship and sustainable living that we at Cabot Highlands, along with the entire Cabot family, hold in high regard.

## **Jeremy Matte - Director of Golf at Cabot Highlands**

Having come across Tidal Links products whilst visiting Castle Stuart, I was immediately struck by their unique design & sustainability story. We reached out to the team and requested some designs of our own for Castletown. Having received them and witnessed the overwhelming response from our members, we're anticipating they'll become one of our strongest selling items and a great addition to the retail arm of our business.

## **Andi Howland - General Manager at Castletown Golf Links**
